## Display System

## Introduction & Application

**GPL** suspended cable display systems boast an elegant hanging technology, ideal for showcasing documents, presentations, photos, or drawings on walls. The tension display system designed to create tautness & can be configured in various setups-ceiling to floor, wall to wall, or ceiling to wall. Accompanied by versatile hardware, including single side shelf clamps and shelf supports for both wood and glass, the tension display system offers adaptability.

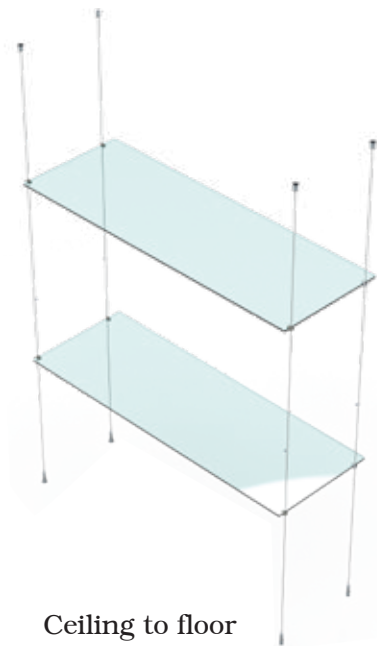

Our display systems encompass not only tension options but also drop-ceiling supports, sign suspension kits, poster hanging sets, and acrylic pockets. These versatile components cater to a wide range of displays from point-of-purchase presentations, photography, banners, shelving, to sculptures and advertisements. Tailored for homes, offices, retail spaces, galleries, and museums, GPL cable display systems provide a creative outlet without the need to damage ceilings or walls.
